

03 June 2013

TO WHOM IT MAY CONCERN,

**RE: ROBBIE STROEBEL - DESIGN AND CONSTRUCTION OF CIVIL WORKS**

This letter serves to confirm that Robbie Stroebel was responsible for the civil design and construction of two major projects that have been complete over the last 8 months.

**Shanduka Steelcoal plant**

A new coal washing plant was built in the second half of 2012 and commissioned in March 2013. The Steelcoal plant is situated in Middelburg Mpumalanga.

**Shanduka Graspan Plant**

A new two stage crushing plant was built in the first quarter of 2013 and will be commissioned shortly. The Graspan plant is situated in Middelburg Mpumalanga.

Robbie Stroebel was appointed as the preferred civil engineering contractor to complete all the civil design work and to carry out the construction of the various concrete structures. The projects were executed in a professional manner and were completed on time and within budget, I believe that the personal involvement of Robbie Stroebel Management was an winning combination.

The site was staffed with knowledgeable supervision and highly skilled tradesmen. Robbie Stroebel safety on site was led by a full time safety officer and they had an excellent record. The workmanship of the concrete structures was of a superior standard, much care was taken in this regard.

I found Robbie Stroebel to be sufficiently competent, and would highly recommend them for future projects.

Yours Sincerely,

Henry Duvenage  
Group Engineering and Plant Manager
